Department of Mechatronics Engineering

COURSES COVERED

- Engineering Drawing & Graphics
- Network Analysis
- Computer Aided Design (CAD)
- Digital Signal & Image Processing

Lab Supervisors: Engr. Sarmad Hameed & Engr. Sulaiman Dawood
**Objective**

The purpose of the Design and Simulation laboratory is to assist students in building their own problem solving skills. It serves as the laboratory for a number of courses with software related labs. Furthermore, the lab is available to Mechatronics undergraduate students to complete their course work and project during open hours i.e. when class is not in progress.
